Introduction to ePrint Folders

ePrint Folders^(sm) is a software product that allows music teachers to share copyrighted sheet music with their class legally. The library consists of digital sheet music your music department has purchased for choir, band, orchestra, and other musical needs. Teachers assign music from their ePrint music library so students can see the music on their own devices. Pepper is the sole source provider of ePrint Folders.

About J.W. Pepper

Founded in 1876, J.W. Pepper is the most trusted sheet music supplier to schools, delivering unparalleled customer service to music educators through its distribution centers, apps, stores, and website jwpepper.com. Pepper offers over a million sheet music products and music equipment, accessories, and technology solutions that support music programs throughout the US.

Benefits

- 100% legal sharing of copyrighted music
- Meets the need for in-person and remote learning scenarios
- Educators can share digital music purchased previously with Pepper
- Prevent the loss of music year over year as teachers recall digital music to instantly replenish the school's digital music library, preserving the school's investment
- Compatible with online devices, including iPads, Chromebooks, desktop and laptop computers, and smartphones.
- Updates to this web-based service happen automatically without support from the technology department

Student Accessibility and Remote Learning

ePrint Folders provides access for all students in the academic setting, whether they are remote or in-person. Our technology is device agnostic so that students can view their assigned music with any online device. Pepper also offers a free ePrintGo app so students can see their music even without an internet connection. Students only need to be online while the music syncs to their digital folder.

Curriculum Support

Unlike other music learning platforms, because J.W. Pepper is the largest provider of sheet music in the world, your teachers can build their digital library to exactly match your curricular needs. Our library of over a quarter million digital music titles gives your teachers the flexibility to enhance student learning and engagement with content that meets student, school, community, and cultural needs. And, if needs change, teachers can quickly assign music to support the new requirement.

Differentiated Instruction

Differentiated instruction is essential in education. ePrint Folders helps teachers meet the needs of all learners by enabling easily custom-built folders of music for different students. Suppose a student needs help tackling a new skill or needs enrichment and more challenging material to take them to the next level. In that case, teachers can quickly provide content to reinforce the concept and support individualized instruction.

Classroom Management

Start of the year set up, post-performance collection of music, year-end wrap-up, and keeping up with changing rosters as students come in and out of the music program are easier to manage with ePrint Folders. Managing changing rosters is handled quickly with a simple passcode addition or change. Eager new participants get instant access to their digital folder. Change handled!

Other management perks include:

- Teachers don't have to wait for rehearsal to assign music.
- Students can't lose their digital folder or leave it at home on lesson or rehearsal day.
- Teachers can quickly tee up warm-ups and skill builders. And, when students need a break from the usual routine, add fun tunes into the folders to build student confidence and motivation.

Teacher Support

The process used in ePrint Folders – create folders, put music in the folders, assign folders to a student - mirrors the process teachers use in person, so there is no steep learning curve. We have ample online assistance, including video walk-throughs and Q&As. Pepper provides free support for teachers via phone and email.

Pricing

Each ePrint Folders subscription serves one teacher. The plans below accommodate different amounts of ensembles or classes taught. Subscriptions are purchased on an annual basis using a school purchase order, 30-day net billing account, or credit card. Each folder may only be assigned to one student; however, teachers can assign multiple folders to a single student should the need exist (ie: a student is in both band and chorus). Please contact us if you require a configuration that exceeds the plans below:

- Basic \$99 (one teacher with 1 ensemble, access to 500 student folders)
- Standard \$199 (one teacher with 5 ensembles, access to 500 student folders per ensemble)
- Premium \$299 (one teacher with 9 ensembles, access to 500 student folders per ensemble)

Data Privacy

ePrint Folders allows music teachers to share music to a digital folder. Students access the digital folders using a login and passcode created by the teacher. At no time do we ask for personally identifiable information for the student. For teachers and bookkeepers involved in purchasing products and ePrint Folders, we may ask for certain personally identifiable information to carry out our services, such as fulfilling orders, managing subscriptions, asking for feedback, and providing technical support. Usage data will be collected, such as IP address, browser type, browser version, etc. See our privacy statement at <https://www.jwpepper.com/privacy>.

To Coda

- Pass out and collect digital sheet music (ePrint) in seconds
- The teacher controls student folder content and logins
- Each student's digital folder contains the music and parts they need to see, no more, no less
- Never lose a part or copy
- See music from any online device or without a connection by using the free ePrintGo app
- Over a quarter-million titles available for purchase and sharing
- Support creators of music by using a platform that gets composers paid and respects copyright

Thank you for your consideration!
